GENTS DRESSES SOFTWARE 6.0

Pattern software for gents' wear

Drafting in **30** seconds
Master Touch

Just type the measurements

Choose your cutting output

1 **Enter measurements**
Length, chest, waist, shoulder, sleeve, neck

→

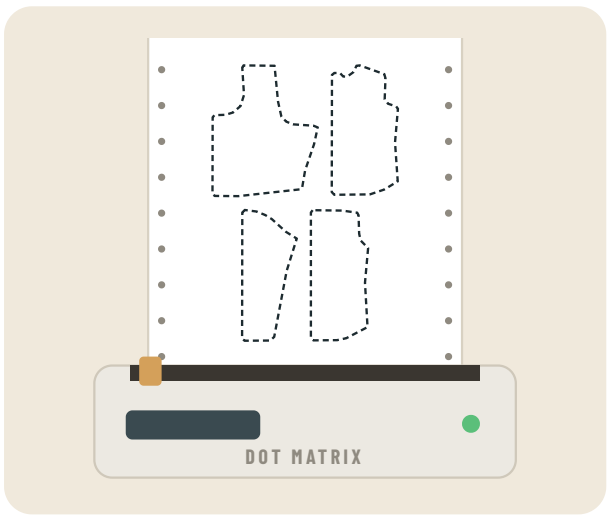
2 **Pattern in 30 seconds**
Yoke, collar, sleeve, crotch curve — automatic

→

3 **Get output**
Paper, projector or laser

One shirt (4 pieces) — how long?

Printer		5 minutes
Projector		3 minutes
Laser cut		1 minute



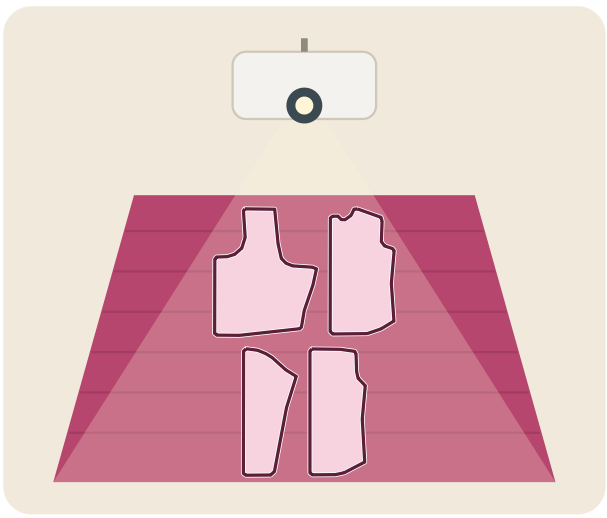
Printer cutting
Printer software

5 minutes
One shirt · 4 pieces

Prints the pattern on a dot-matrix printer — place it on the fabric and cut.

- ✓ Pattern ready automatically
- ✗ No paper needed
- ✗ Cuts the fabric automatically

Best for
Boutique · small shop



Projector cutting
Projector software

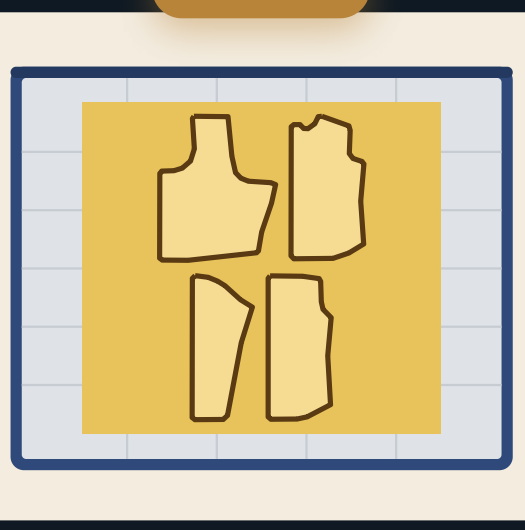
3 minutes
One shirt · 4 pieces

Projects the pattern straight onto the fabric — no paper cost.

- ✓ Pattern ready automatically
- ✓ No paper needed
- ✗ Cuts the fabric automatically

Best for
Boutique · designer

Fastest



Fabric cutting
Laser software

1 minute
One shirt · 4 pieces

The laser cuts all 4 pieces — stitch notches added automatically.

- ✓ Pattern ready automatically
- ✓ No paper needed
- ✓ Cuts the fabric automatically

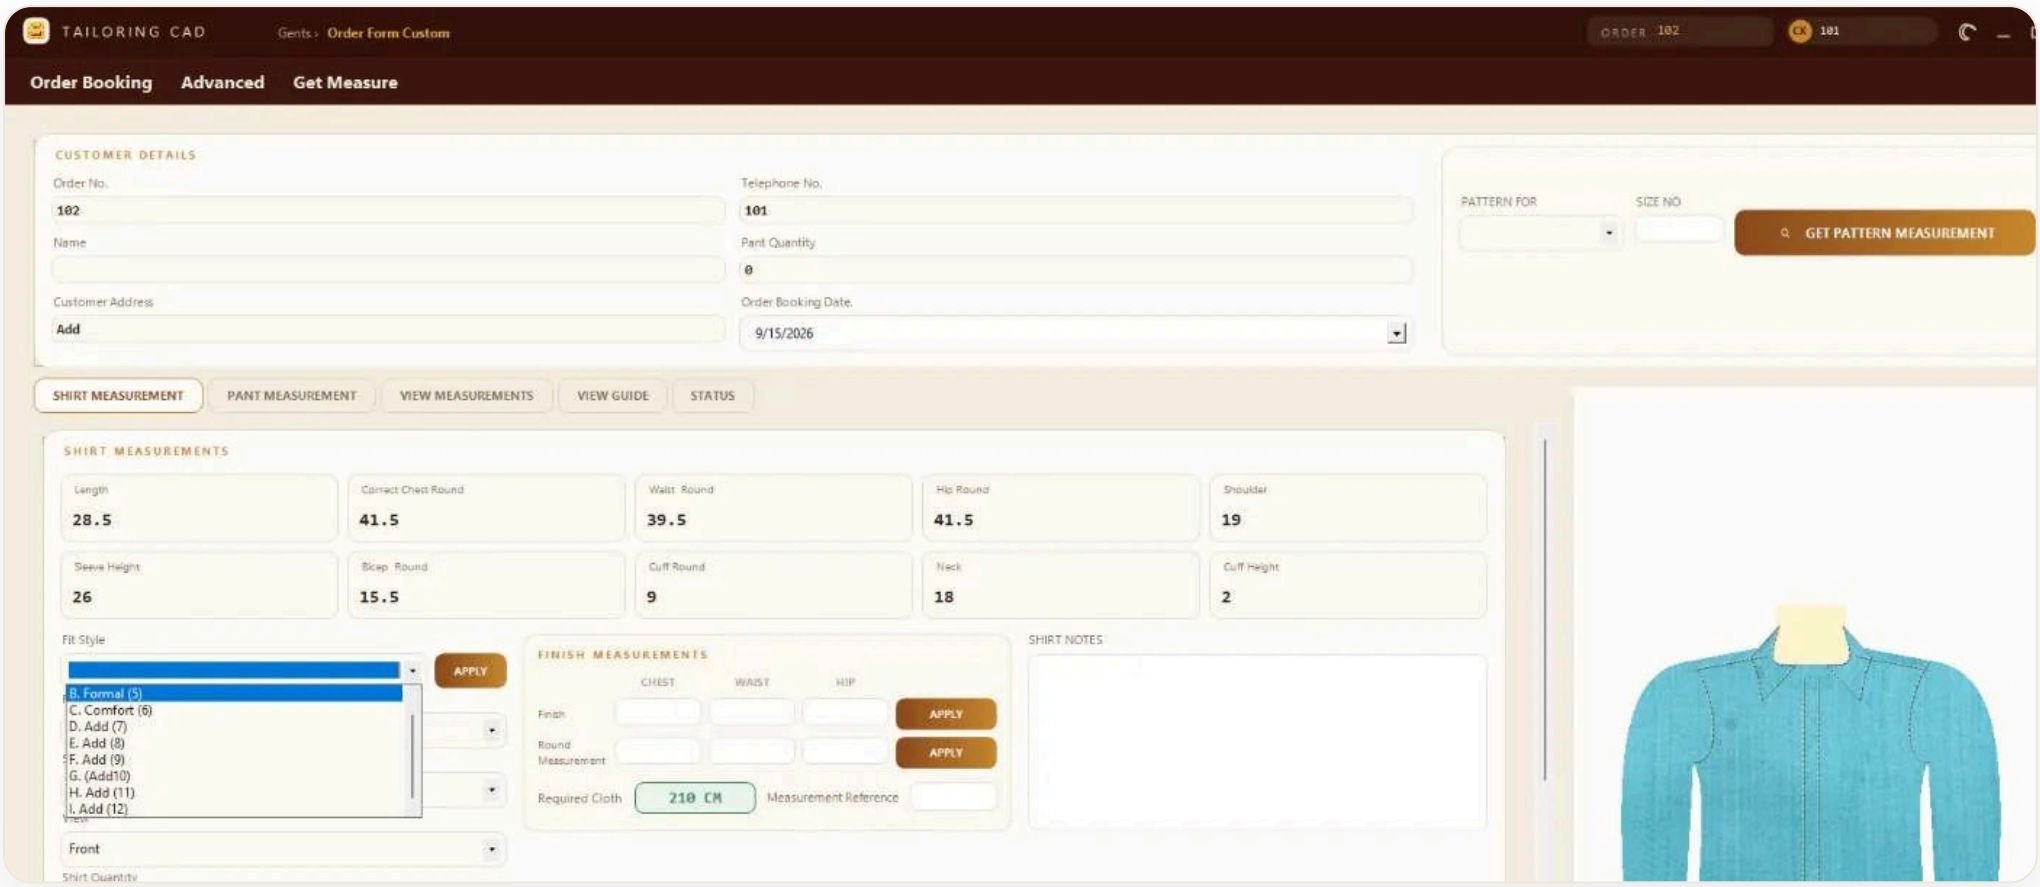
Best for
Mid-size shop · bulk production

* Average time per pattern — from typing the measurements to the output.

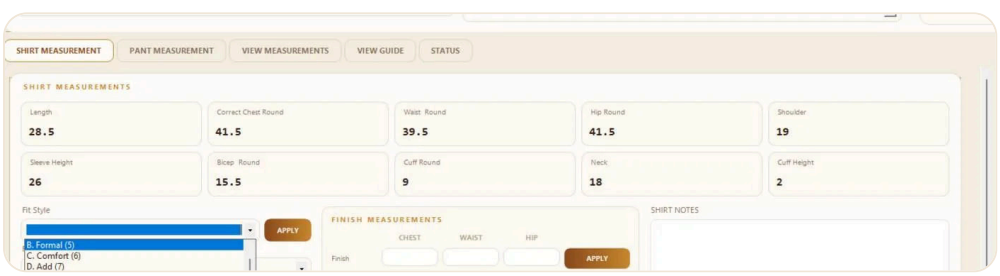
GENTS SOFTWARE

Gents software

Shirt, pant, kurta, blazer, sherwani, Jodhpuri coat — dedicated software for gents orders. Order booking, measurements, fit style and required cloth, all on one screen.



Order booking + shirt measurement screen — order number, phone and date on one side; measurements, fit style and live drawing on the other.



Measurement fields — length, chest, waist, hip, shoulder, sleeve, bicep, cuff, neck. Fit style: Formal / Comfort / Add 7–12. Required Cloth 210 CM automatically.

Model selection — Without / With Shoulder Shirt · Safari · Kurtha · Blazer · Sherwani · Jhothpuri Coat.

GENTS DRESSES SOFTWARE 6.0

Gents models — in one software

Shirt & ethnic, pant & pyjama — pick a category and browse the models.

Shirt & ethnic

With / without shoulder shirt, kurta cutting — plus kurta, blazer, sherwani and Jodhpuri coat. Every model's pattern is available for both laser and printer.

Formal Shirt

Half Sleeve Shirt

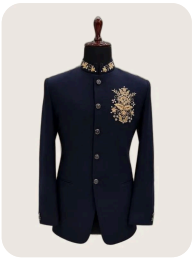
Casual Half Sleeve

Overshirt

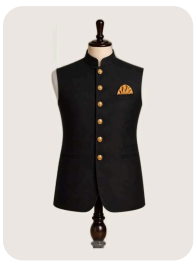
Safari Shirt

Kurta

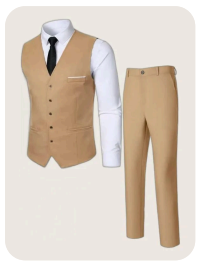
Sherwani



Jodhpuri Coat



Nehru Jacket



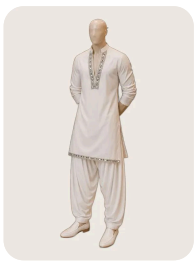
Waistcoat Set

Blazer

Double-Breasted Blazer

Pathani Suit

Kurta Pyjama



Kurta · Patiala

Shirt models
Without shoulder · With shoulder · Kurta cutting.

Ethnic
Kurta · Blazer · Sherwani · Jodhpuri.

Fit style
Formal / Comfort — Required Cloth automatically.

Pant & pyjama

No pleats, 1 & 2 pleats, cargo, simple salwar, chudi pyjama, pyjama pant, patiala salwar — enter the measurements and inseam and total round are calculated automatically.

Pleated Trouser

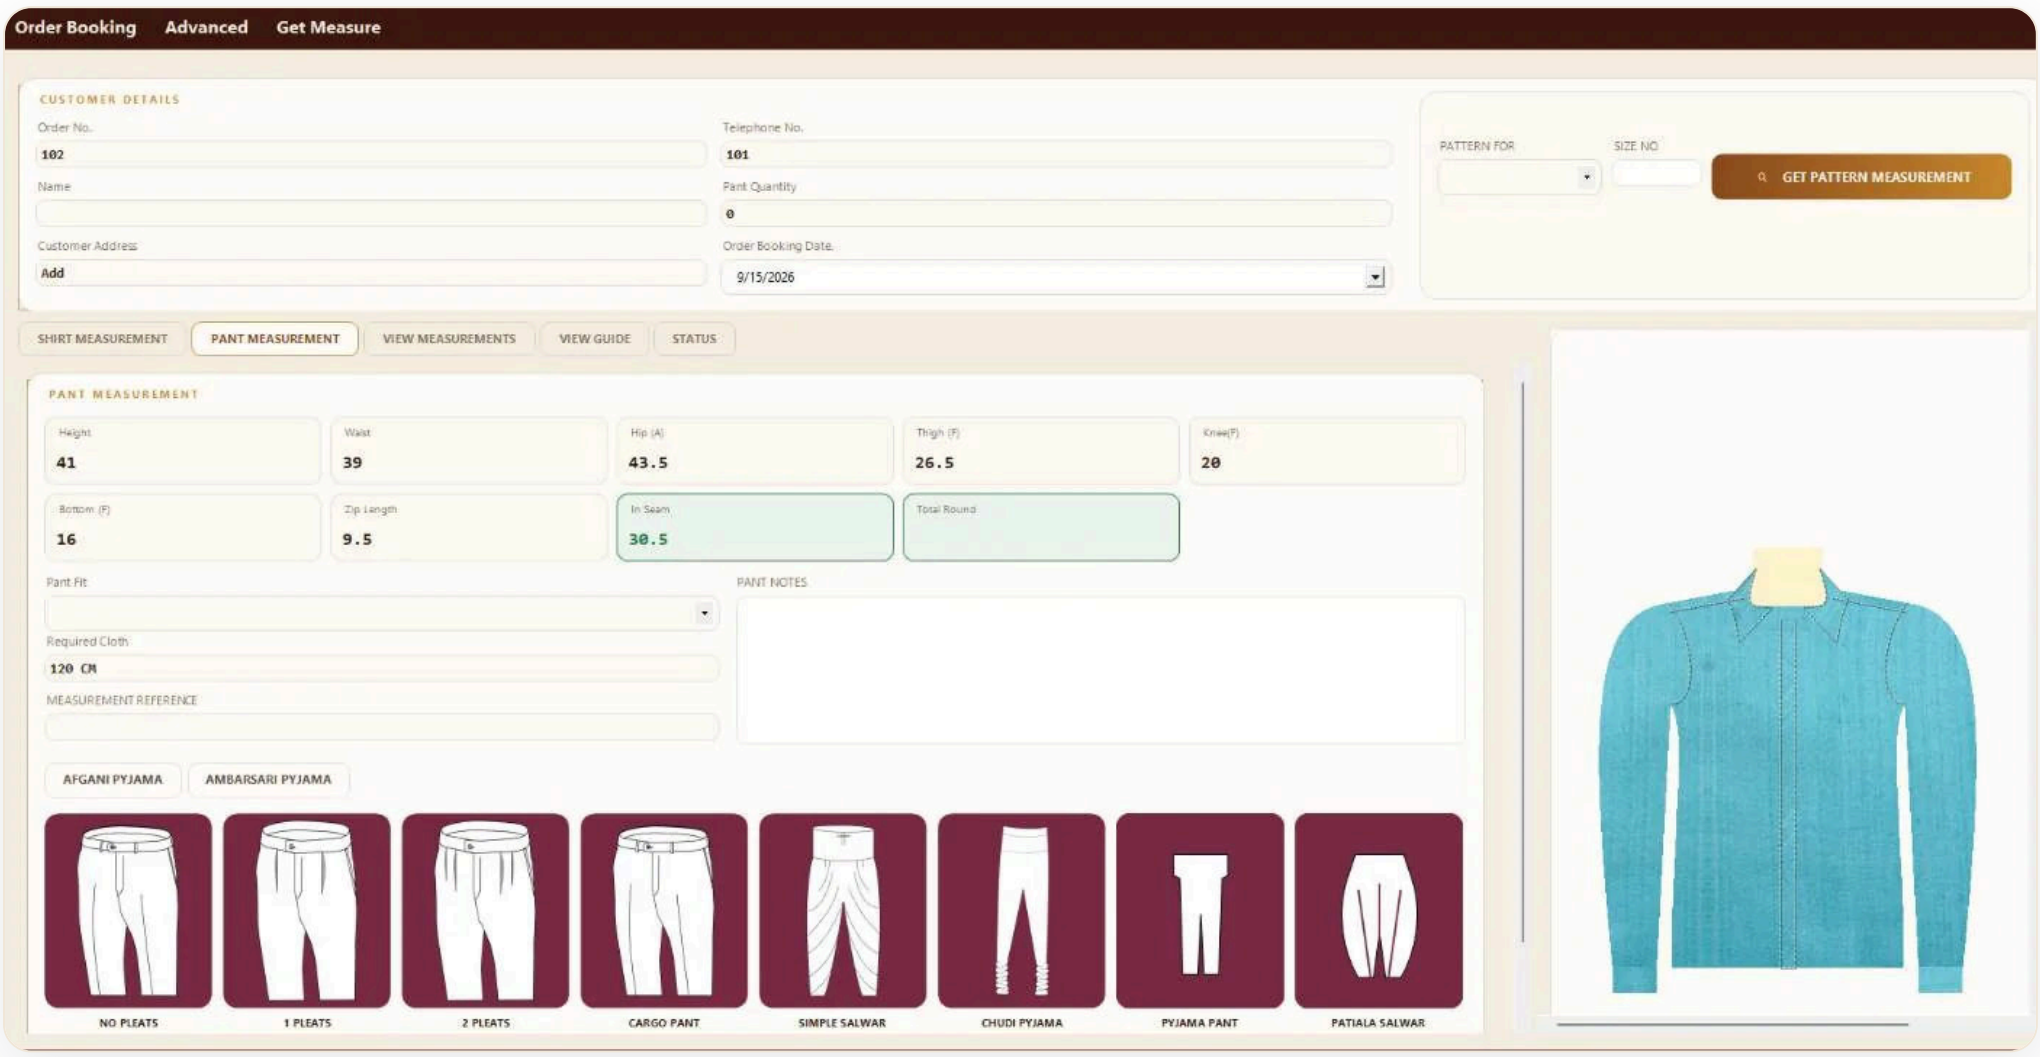
Formal Pant

Double Pleat Pant

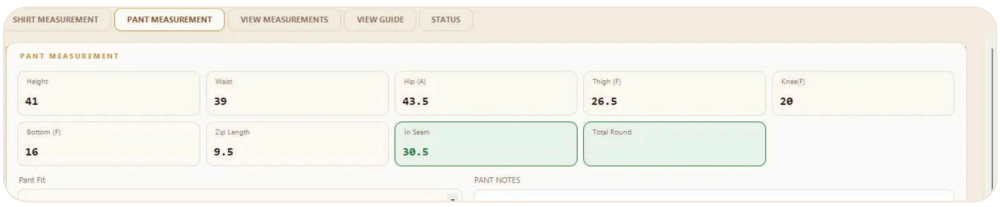
Cargo Pant

Pyjama Pant

Pant measurement screen



Pant measurement screen — order details, measurements, pant notes, model gallery, live drawing.



Height, waist, hip, thigh, knee, bottom, zip length — the software calculates In Seam 30.5 and Total Round.

No pleats · 1 pleat · 2 pleats · Cargo · Simple salwar · Chudi pyjama · Pyjama pant · Patiala salwar.

Automatic inseam

No calculating by hand.

Required Cloth

Shows 120 CM right on the screen.

Pant notes

Customer preferences saved with the order.

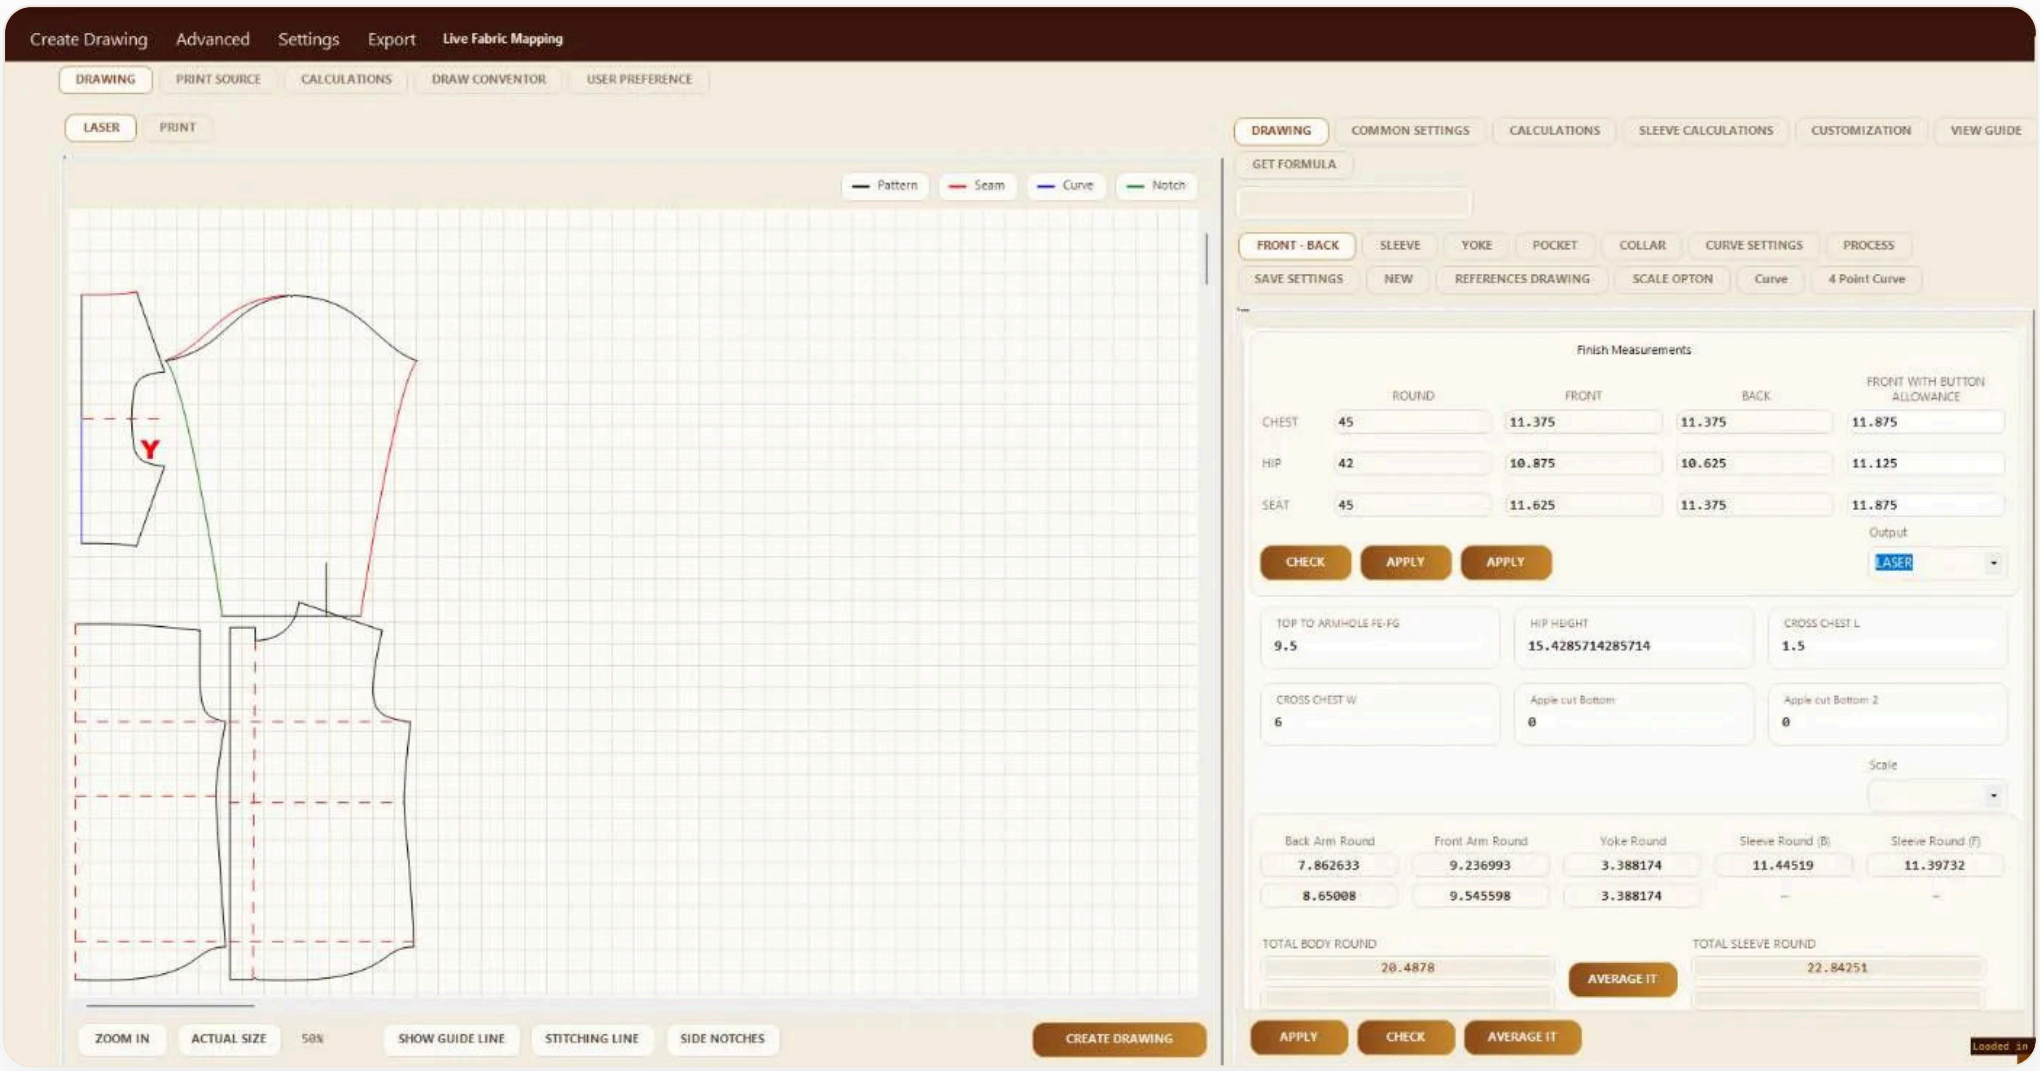
Pant type

Flat front · Single pleat · Double pleat.

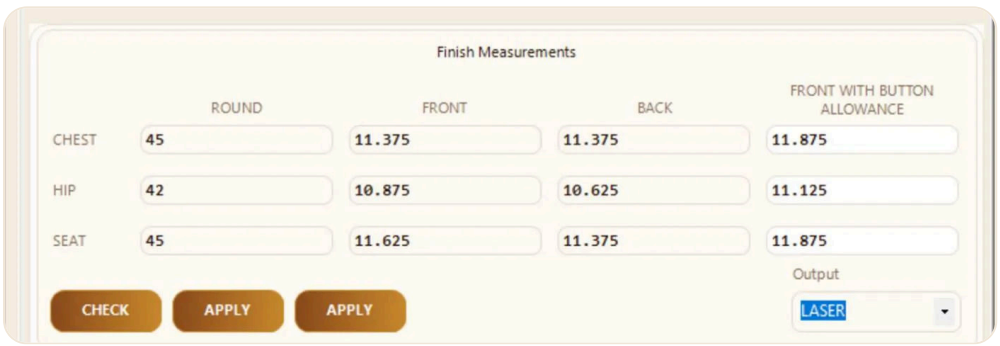
PATTERN PROOF

Shirt cutting page

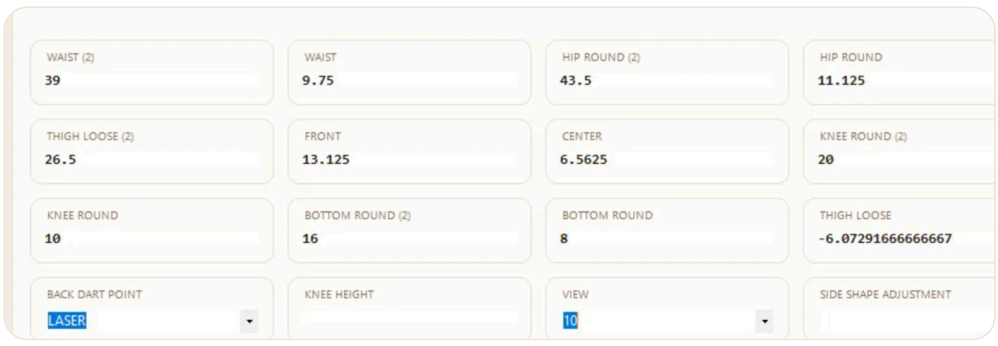
Enter the measurements and the cutting page appears automatically — pattern, seam, curve and notch each in its own colour. Choose LASER or PRINT as the output.



Pattern drawing on the left, measurement panel on the right — separate tabs for front–back, sleeve, yoke, pocket and collar.



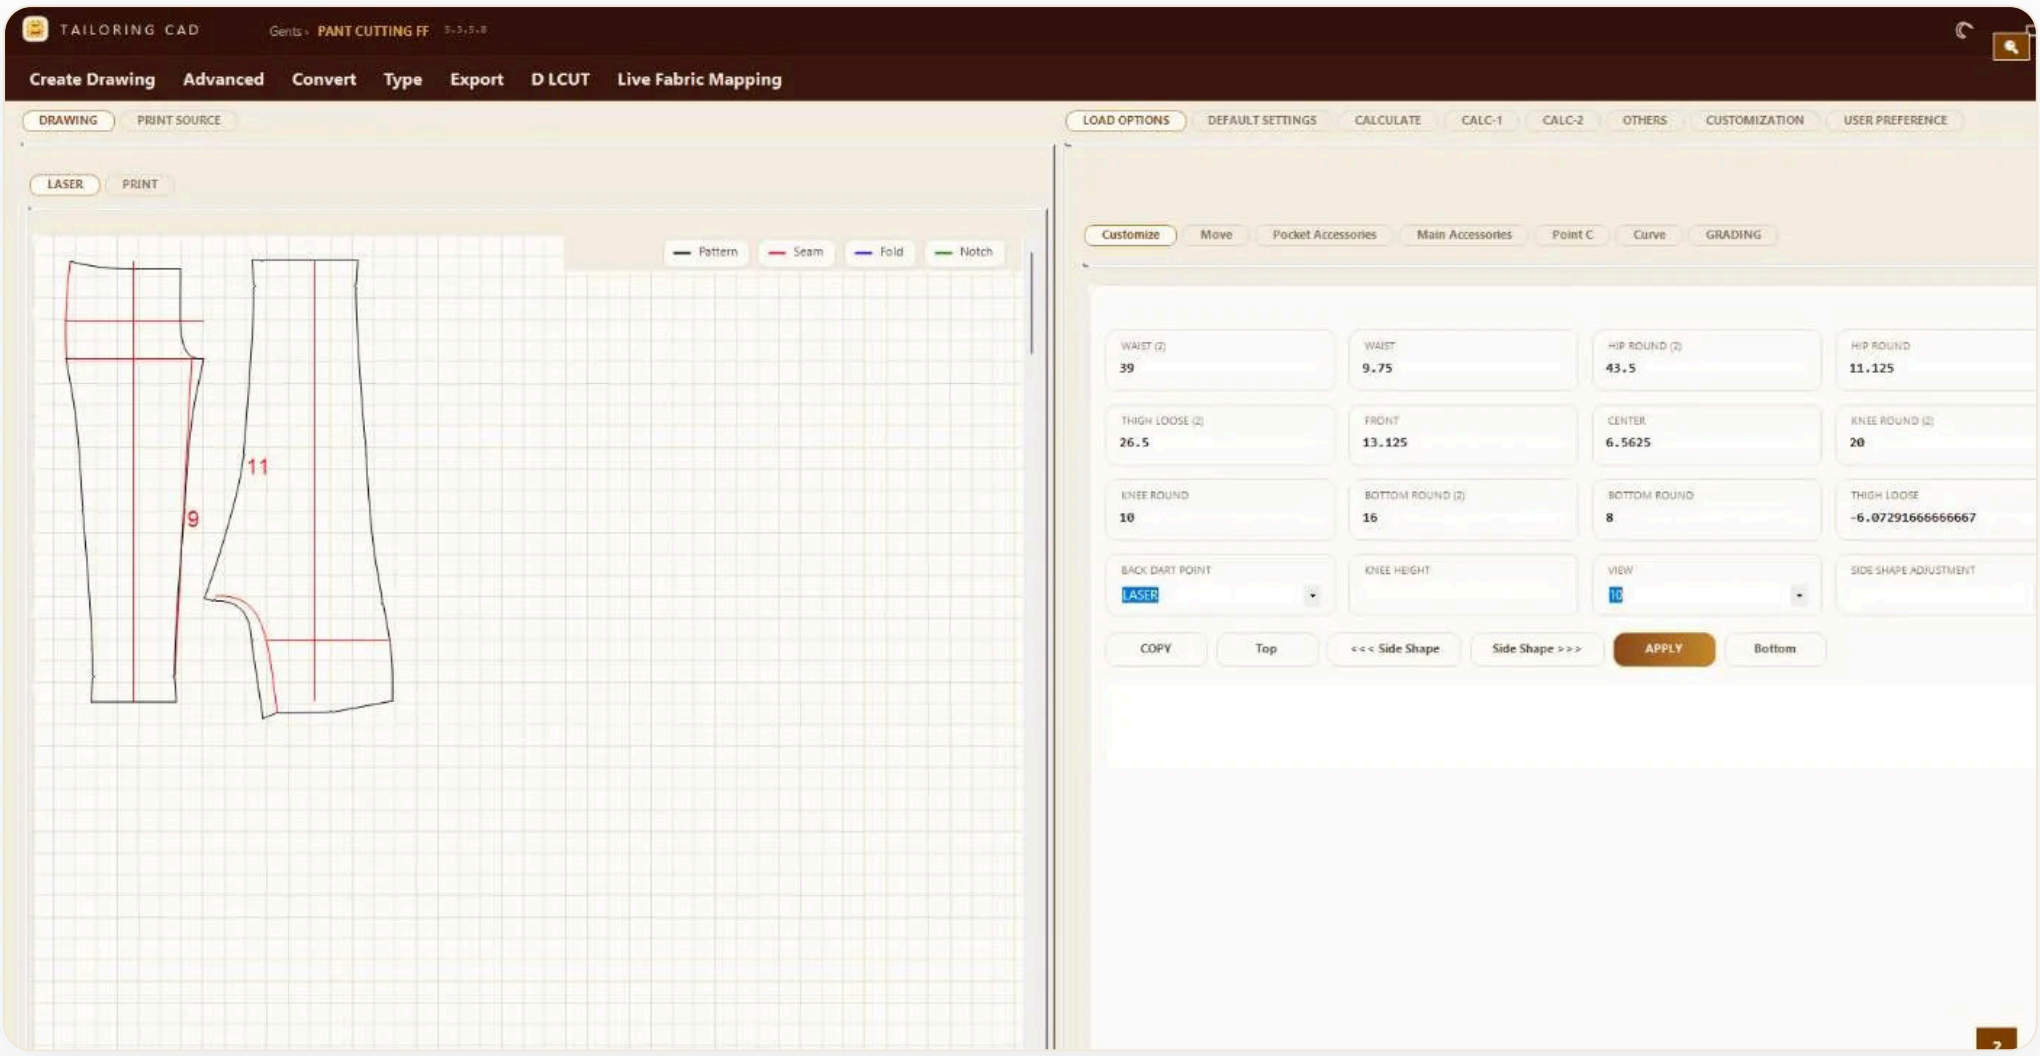
Finish measurements — chest 45, hip 42, seat 45; front / back / button allowances set separately. Output: LASER.



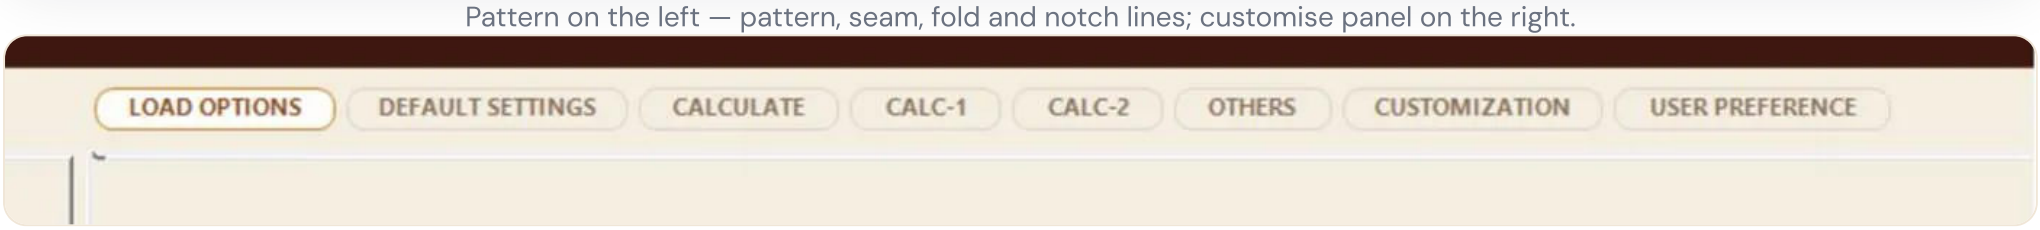
Waist 39 · Hip round 43.5 · Thigh loose 26.5 · Front 13.125 · Centre 6.5625 · Knee 20 / 10 · Bottom 16 / 8. Output LASER.

Pant cutting page

Pant cutting FF — enter waist, hip, thigh, knee and bottom for the full pattern, crotch curve included. Side shape, pocket accessories and grading on one page.



Pattern on the left — pattern, seam, fold and notch lines; customise panel on the right.



Load Options · Default Settings · Calculate · CALC-1 · CALC-2 · Others · Customisation · User Preference tabs.

Gents — how it works

01

Enter measurements

Length, chest, waist, shoulder, sleeve, neck — right on the order booking screen.

02

Pattern draft

Full pattern automatically, including yoke, collar, sleeve and crotch curve.

03

Print out

Plotter print — straight to the cutting table.

04

Perfect fitting

Fit style — Formal / Comfort; Required Cloth automatically.

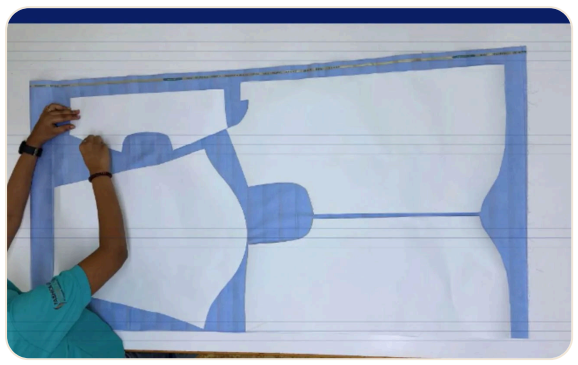
CUTTING OUTPUT

Real output — 3 ways

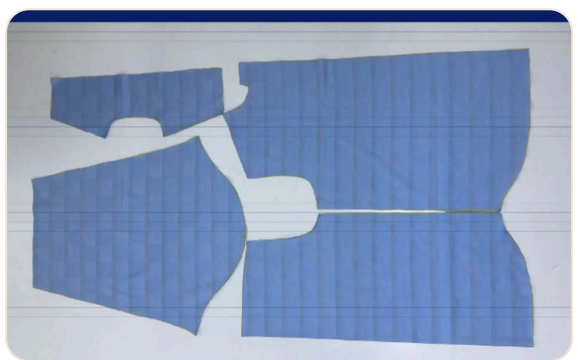
One software — three types of output to suit your shop's size. Projector for paper-free work, plotter for mid-size shops, laser for large-scale production.

01 Plotter

The plotter draws the full pattern directly at fabric size — no joining needed.



Full-size plotter paper — marking on the fabric.

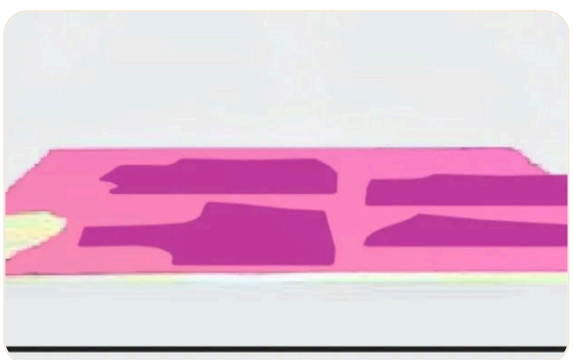


All pieces on a single fabric — less waste.

02 Projector

Project the pattern directly onto fabric — zero paper cost.

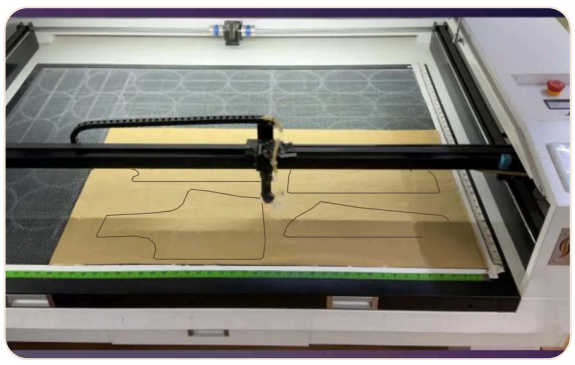
Overhead-mounted projector — runs the software file directly.



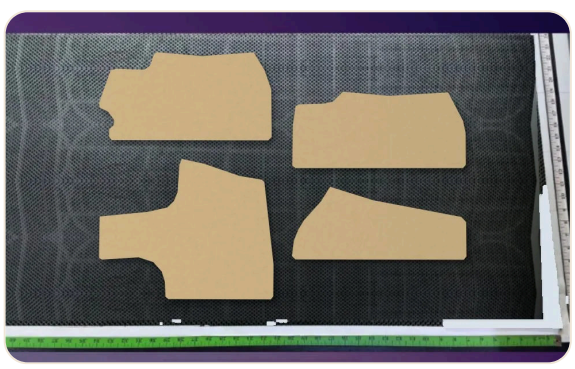
Pattern projected onto the fabric — just mark it and cut.

03 Laser

The laser machine cuts the fabric itself — no hand cutting, 100% accuracy.



Fabric on the laser bed — runs the software file directly.



Laser-cut pieces — clean edges, no fraying.

One software
One measurement entry for all three outputs.

Upgrade later
Start with a projector and move to plotter / laser.

Machine supply
We supply the plotter & laser machine too.

OUR PRODUCTS

Choose your output

One Tailoring CAD software — choose the output that fits your shop size, order type and investment. Each comes in a **Ladies** (blouse, chudidar, kids) or **All-in-One** (+ gents, uniform) variant.

PSWP · PSALL

Plotter software

The plotter draws the full-size pattern + **stitching lines** — marking done right at cutting time.

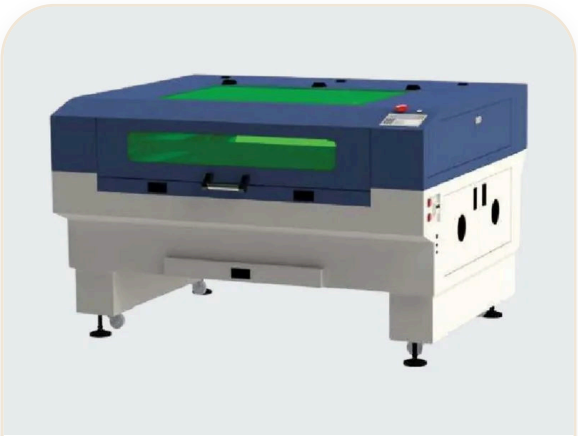
Gents · Family tailoring

PRSL · PRSALL

Projector software

Project the pattern directly onto fabric and mark it — no paper cost.

Boutique · designer



LSOG · LSOL · LSOGU · AIOL1610

Laser 1610

Bed 1600 × 1000 mm — for bulk production of shirts, pants and uniforms. Less fabric waste, factory quality.

Unit · Bulk production

Ladies variant
Blouse · Chudidar · Kids

All-in-One variant
+ Gents · Uniform

Start with a printer, move to laser

FEATURES & SUPPORT

Why this software

Anyone with basic computer knowledge can learn it in a day. From installation to training — we take care of everything.

Automatic drafting
Enter customer measurements and get the full pattern automatically.

One-click print
No hand drawing on brown paper.

Stitching line + notch
Plotter / laser draws stitching lines and notches.

Cutting accuracy
The same quality fit for every customer.

Higher order capacity
Save drafting time — earn more every day.

Consistent quality
Many tailors, many orders — the same output.

Support & training

- On-site installation — set up right in your shop.
- 4 hours of live training + 8 recorded classes (2-day training for the laser machine).
- Dedicated relationship manager + WhatsApp group support.
- Tamil, Malayalam, Telugu, Hindi, Kannada — 9:30 AM – 6:00 PM.

Laser machine specifications

	1390	1610
Bed size	1300 × 900 mm	1600 × 1000 mm
Machine size	6 ft × 7 ft	7 ft × 8 ft
